Thor - TT21350DHE

15 Lpm 500 Bar

With a powerful Hatz twin cylinder diesel engine driving an Interpump 66 Series pump the Thor heavy duty pressure washer has been designed to operate in the most demanding of environments.

A key feature of the Thor is the unique Vibroflex torsional drive coupling. Located in-between the engine and gearbox it eliminates the on-off stresses and snatch effect that can occur when a conventional hollow to solid shaft drive system is used.
